

if (m > m) n = n - m;

ele m = m - n

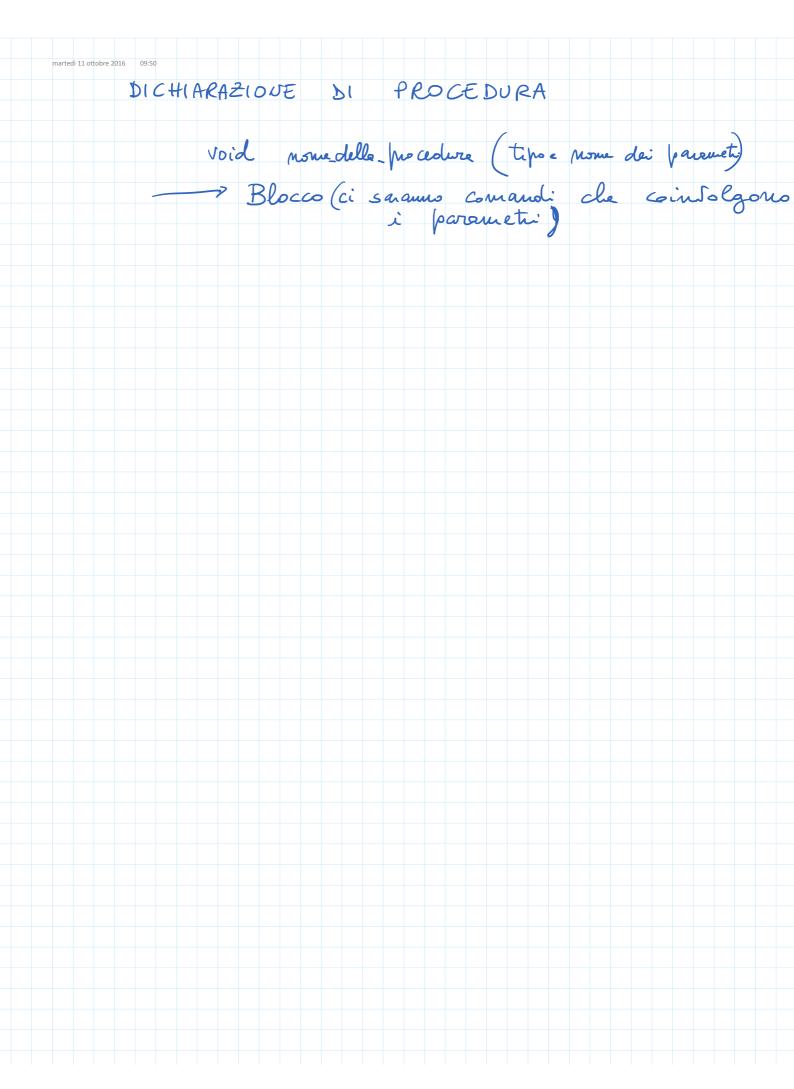

rendre queta parte
di programma
parametrice?
Posso dargli un
nome e vichamarle
per nome?

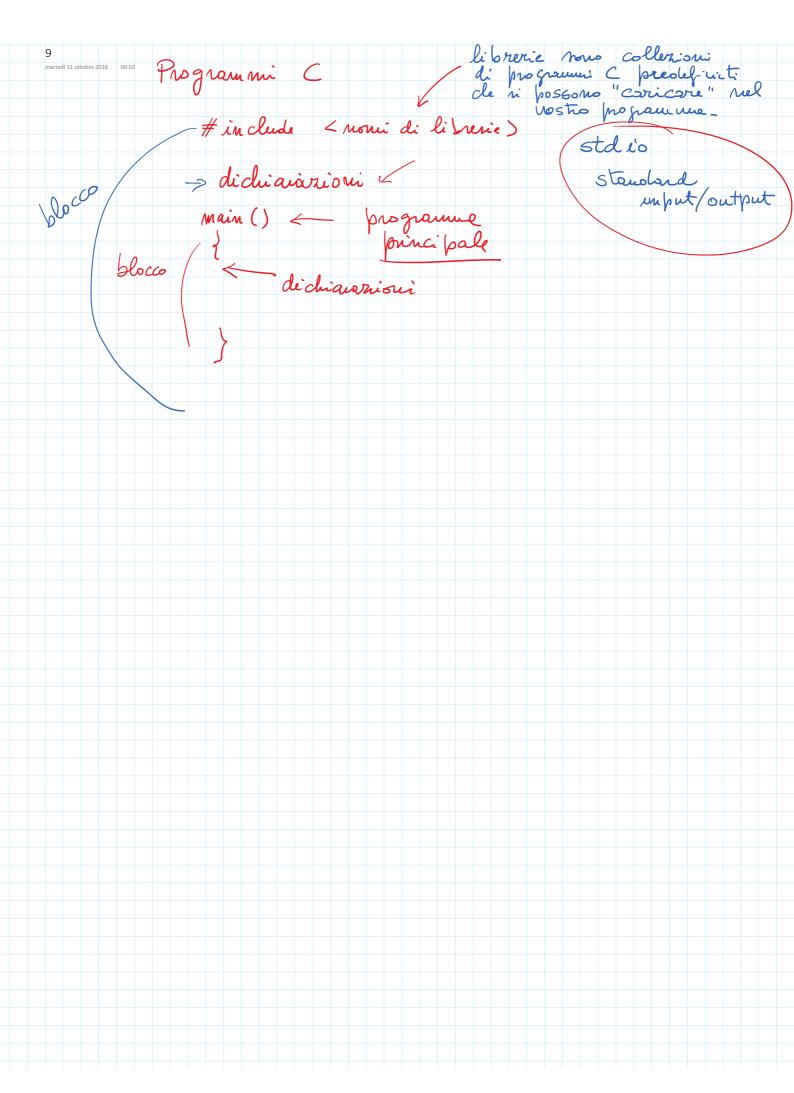

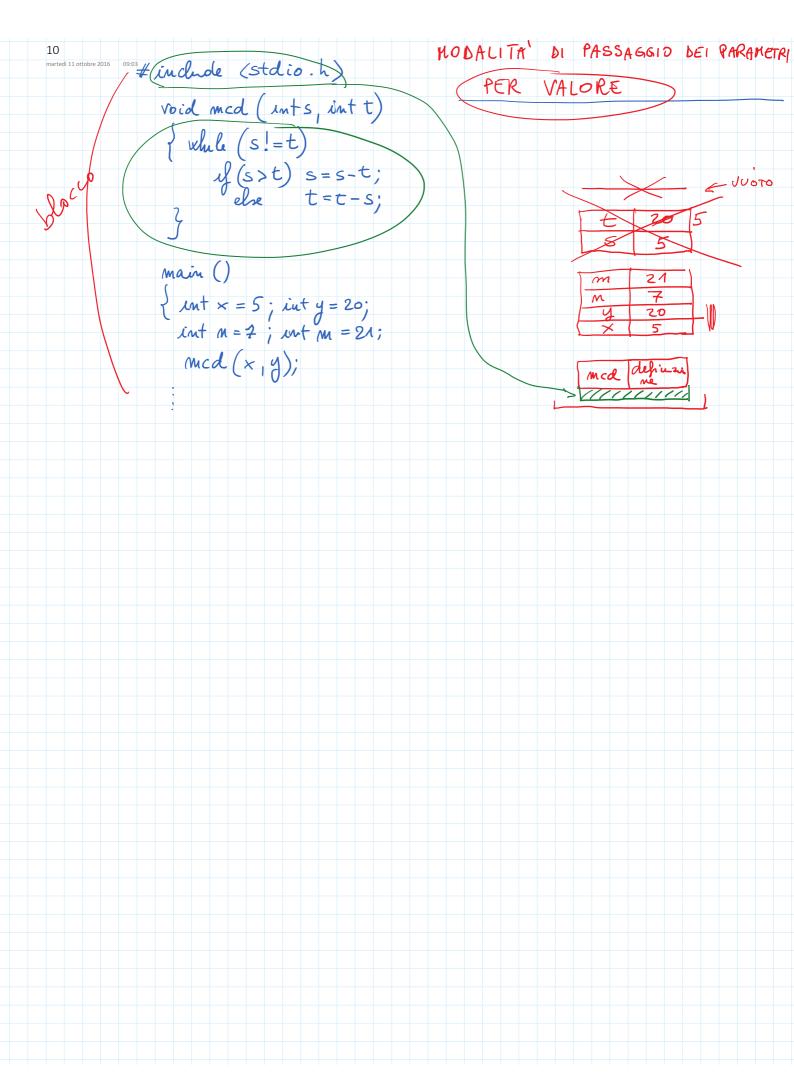

$$\int (x) = x + 1$$

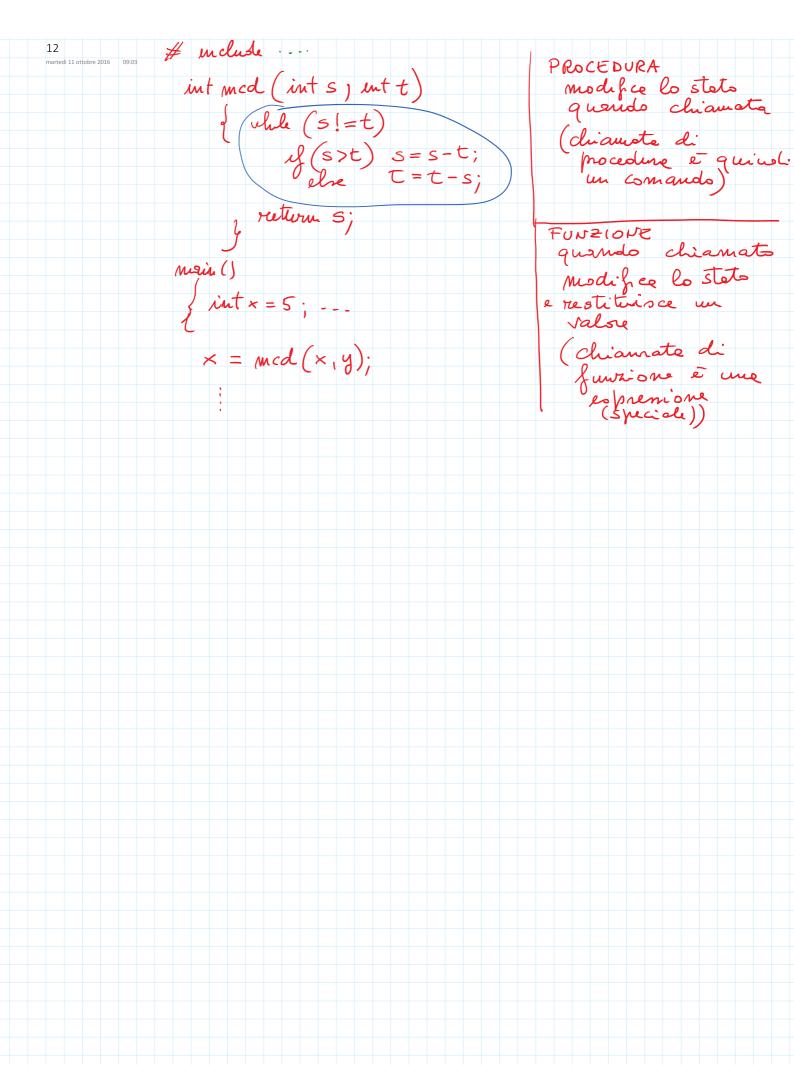

$$g: \mathbb{Z} \rightarrow \mathbb{Z}$$

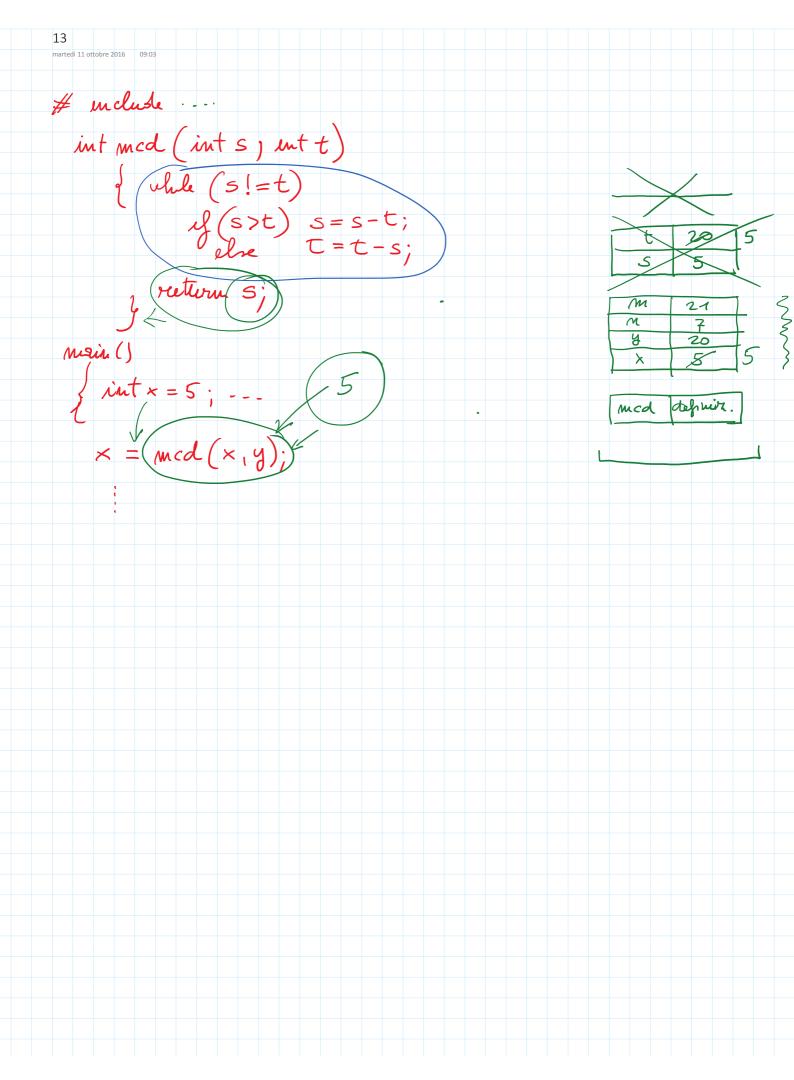

Voil marted is much do so mt & , int & void med (ent x just y while (s!=t) if (s>t) s=s-t; ely t=t-s; } int & = -- unt y Collegament tre parameture e organient delle procedure si fa attraverso la STATO mcd (x,y); mcd (m, m);
