

## VUA: main related projects

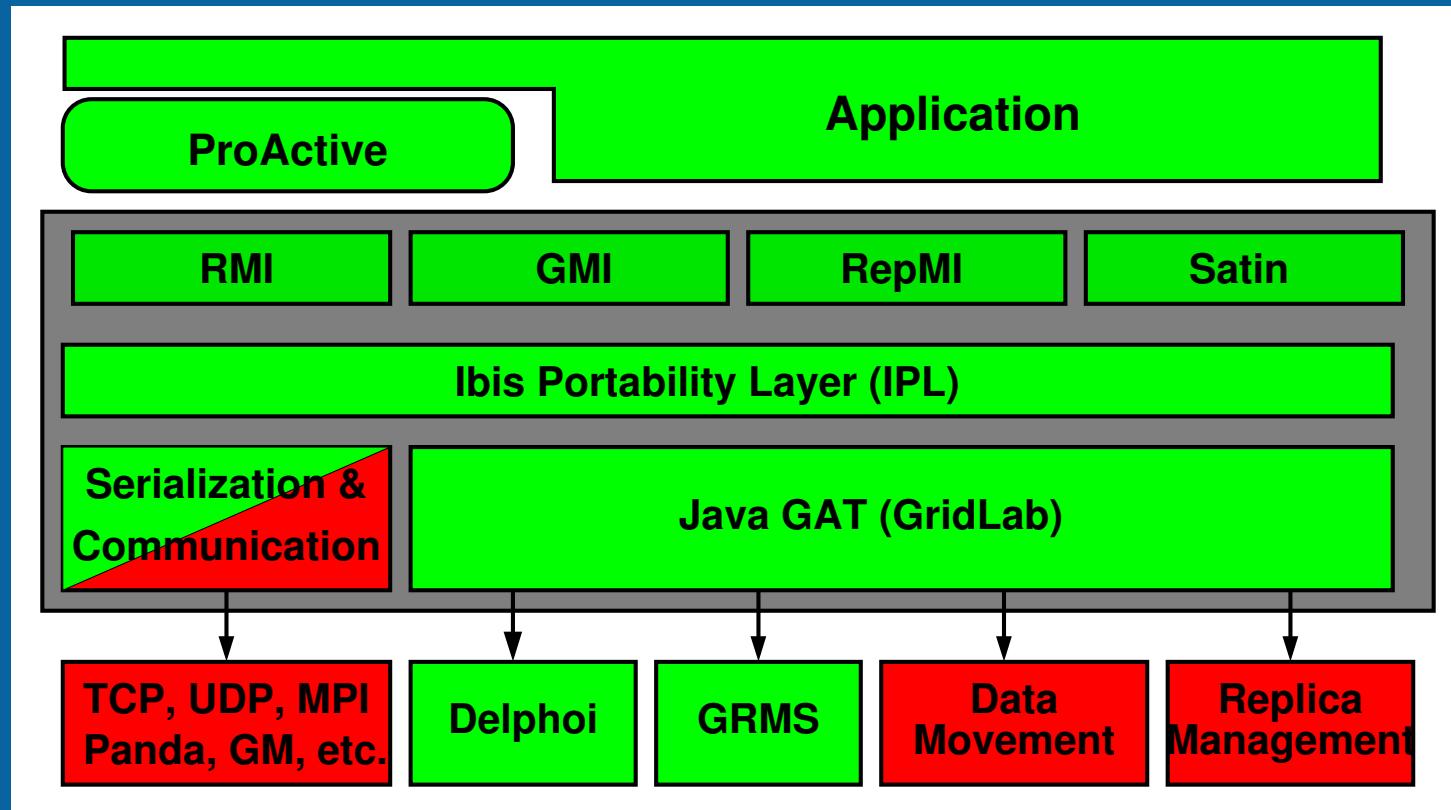

- GridLab (IST, FP5 – 03/2005)
  - ★ large European collaboration
  - ★ goal: Grid Application Toolkit (GAT), providing simple API to grid resources
- VL-e (virtual lab for e-science)
  - ★ large Dutch collaboration
  - ★ goal: programming models for grid apps (using Ibis)

# VUA → task 3.1, 3.3

<b>File Subsystem</b>		
GATFile	GATLogicalFile	GATPipe
GATEndpoint	GATPipeListener	
<b>Monitoring and Event Subsystem</b>		
GATRequestListener	GATRequestNotifier	GATAction
GATMetricListener	GATMetric	GATMetricEvent
<b>Information Exchange Subsystem</b>		
GATAvertisible	GATAvertService	
<b>Resource Management Subsystem</b>		
GATSoftwareDescription	GATResourceDescription	GATResource
GATJobDescription	GATResourceBroker	GATReservation
GATJob		
<b>Utility Subsystem</b>		
GATSelf	GATContext	GATSecurityContext
GATStatus	GATPreferences	URL, Time, ...

active participation in GGF's SAGA standardization  
(**S**imple API for **G**rid **A**pplications)

# VUA → task 3.1, 3.3

fault-tolerant programming models (currently in Satin)
